

2007 Fall Meeting Search Results

Cite abstracts as **Author(s) (2007), Title, Eos Trans. AGU, 88(52), Fall Meet. Suppl., Abstract xxxxx-xx**

Your query was:
landsat

The selected databases contain **40** documents matching your query:

Select some of the following documents:

Select/Deselect All

- 1: [Multi-temporal MODIS-Landsat Data Fusion for Relative Radiometric Normalization and gap Filling of Landsat Data](#)
- 2: [Classification of forested wetlands using ordination of multitemporal Landsat reflectance](#)
- 3: [Retrieving Moderate Resolution Biophysical Parameters by Fusing Landsat-like Data and MODIS Land Products](#)
- 4: [Remote sensing of heat fluxes using SEBAL: Comparison between Landsat and MODIS](#)
- 5: [Comparison of Normalized Burn Ratio, Normalized Difference Vegetation Index, and Enhanced Vegetation Index in Areas Burned by the Jasper Wildfire of Black Hills South Dakota](#)
- 6: [Medium Resolution Global Earth Observations with Landsat: Looking 35 Years Back and 50 Years Forward](#)
- 7: [The Availability of Cloud-free Landsat ETM+ Data Over the Conterminous U.S. and Globally](#)
- 8: [Impervious Surface Mapping of Jungnang-cheon Basin of Korea Using Remote Sensing Images](#)
- 9: [The Suitability of Landsat SLC-off Data to Characterize Mid-decadal Tropical Forest Cover in the Congo River Basin, Africa.](#)
- 10: [VALIDATION OF SEBAL HEAT FLUXES WITH SCINTILLOMETRY](#)
- 11: [Glacier Change in the Rwenzori Mountains, East Africa](#)
- 12: [Water clarity in the Florida Keys, USA, as observed from space \(1984-2002\)](#)
- 13: [Remote Estimation of Gross Primary Production in Crops at Field and Regional Levels](#)
- 14: [Monitoring National Forests in Eastern U.S. Using Landsat Observations](#)
- 15: [Trends in Mapping, Measuring, and Monitoring Land Cover Change](#)
- 16: [Remote Sensing Approach for Documenting the Conversion of Mangroves to Aquaculture](#)
- 17: [Analysis of Early Forest Regrowth in the Eastern US using IceSAT/GLAS-LiDAR and Landsat- spectral data.](#)
- 18: [Two decades of forest disturbance and regrowth across the United States evaluated using the Landsat record for the North American Carbon Program](#)
- 19: [A Prototype of Updating National Land Cover Dataset by Using Landsat Imagery](#)
- 20: [A Megamodel-Classifer in Support of a Sampling Strategy Using Landsat Data to Estimate Deforestation in the Brazilian Amazon](#)
- 21: [Landuse Dynamics in a Small Watershed of the Semi-arid Zimbabwe](#)
- 22: [United States Land Cover Land Use Change, Albedo and Surface Radiative Forcing 1973 to 2000](#)
- 23: [Analyzing Whitebark Pine Distribution in the Northern Rocky Mountains in Support of Grizzly Bear Recovery](#)
- 24: [Estimating Hourly Land Surface Temperatures at 1-km Spatial Scales over the Southwestern U.S.](#)
- 25: [Promoting Sustainable Agricultural Practices Through Remote Sensing Education and Outreach](#)

- 26: [Remote Sensing Time Series Analysis of Coupled Impacts of Disturbance and Management on Landscape Carbon Storage in the Okavango Delta, Botswana](#)
- 27: [Using LandSat and SRTM datasets to develop relationships for estimating bankfull channel widths in the Amazon Basin](#)
- 28: [Sugar Maple Phenology: Anthocyanin Production During Leaf Senescence](#)
- 29: [Latitudinal Variation In Mangrove Height And Biomass in East Africa Using SRTM Elevation Data](#)
- 30: [Historical Analysis of Remotely Sensed Snow Properties' Relation to Streamflow](#)
- 31: [Using Satellite Imagery to Predict Salinity in a Large Oligohaline Estuary](#)
- 32: [Mapping Changes in Yellowstone's Geothermal Areas and Radiative Flux](#)
- 33: [Satellite Observations of Glacier Advances and Retreat in the Western Karakoram](#)
- 34: [Evaluating Spatial Patterns of Land Use and urban Heat Island in The Fast Growing Metropolitan Shanghai, China](#)
- 35: [Scaling effects on forest area estimation in the three Lake States of USA](#)
- 36: [Quantifying Wetland Dynamics and Hydrologic Function with Landsat Thematic Mapper](#)
- 37: [Spatial Scale for Modelling Blowing Snow on the Canadian Prairies](#)
- 38: [Estimation of Leaf Area Index \(LAI\) Through the Acquisition of Ground Truth Data in Yosemite National Park](#)
- 39: [Morphodynamics of River Lowlands and Deltas: Combining Historical Maps with Satellite Data](#)
- 40: [Developing Cropped Area Estimates for Niger From Multi-sensor Satellite Imagery](#)

[Prior documents...](#)

- 41: [Remote Sensing of Fire Effects on Tamarisk Water Use and River Restoration](#)
- 42: [Vegetation Water Content Retrievals for NAFE06 and CLASIC](#)
- 43: [Cropland Area Extraction in China with Multi-Temporal MODIS Data](#)
- 44: [Interpretations of GLAS LiDAR for the Tapajos National Forest, Brazil](#)
- 45: [Quantifying the Effects of Land Cover Change on Carbon Budgets in Romania](#)
- 46: [Deforestation and pasture establishment in watersheds: Implications for stream biogeochemistry in the Amazon Basin](#)
- 47: [ORNL DAAC MODIS Land Product Subsets](#)
- 48: [How lake morphometry reflects environmental conditions in the permafrost-dominated Lena Delta](#)
- 49: [Impacts of Remotely-Sensed Vegetation Dynamics on Ecohydrological Response in a Small Mountainous Watershed](#)
- 50: [Severe storms and blow-down disturbances in the Amazon forest](#)
- 51: [Delineating Surface Water Features In The Prairie Pothole Wetlands With MODIS Data](#)
- 52: [Ecological Succession, Land use Changes and Soil Organic C Stock in a Lake Retreat Area \(Main Ethiopian Rift Valley\)](#)
- 53: [Information Semantic Tools for Coastal Data Management](#)
- 54: [The ORCA West Coast Regional Project - Use of Top-Down Modeling in a Regional Carbon Budget Approach to Estimate Gross Carbon Fluxes for Oregon-California](#)
- 55: [Recently active reverse faulting in the Atacama Basin area, northern Chile: Implications for the distribution of convergence across the western South America plate boundary](#)
- 56: [Using NASA and Earth Science Products to Improve EPA Non-point Source Water Quality Modeling for the Chesapeake Bay](#)
- 57: [Measuring spectral effects of calcium fertilization in the red spruce foliage](#)
- 58: [Space-Based Observations of Batura Glacier Fluctuations, Western Karakoram Himalaya](#)
- 59: [Long-Term Evolution of Meandering Rivers](#)
- 60: [Comparison of Change Detection Techniques for Assessing Hurricane Katrina-Induced Damage to Forests](#)
- 61: [A cross-scale remote sensing approach to estimate tree cover and aboveground biomass in pinyon-juniper woodlands of the Colorado Plateau, USA](#)
- 62: [Impacts of Pixel Deformation and Misregistration on Cross-calibration of Vegetation Index Data Records](#)
- 63: [Land Cover of Northern Eurasia: Comparison and Assessment of Coarse Resolution Maps](#)
- 64: [Remote Sensing of Boreal Forest Biophysical and Inventory Parameters: A Review](#)

- 65: [Ecohydrological Fingerprinting of Land-Falling Hurricanes in the Southeastern United States - Eloise as a Prototype](#)
- 66: [Climate drivers of fire extent and severity in US Rocky Mountains](#)
- 67: [Estimating and Mapping Urban Impervious Surfaces: Reflection on Spectral, Spatial, and Temporal Resolutions](#)
- 68: [The GLIMS Glacier Database](#)
- 69: [Carbon Consequences of Positive NDVI Anomalies in North America](#)
- 70: [Quantifying the Effects of Forest Canopy Cover on Snow Accumulation and Ablation at a Continental, Mid-latitude Site, Valles Caldera National Preserve, NM](#)
- 71: [Remotely sensed vicennial changes of green phytomass, *Salix* cover, and leaf turnover in a sedge-shrub tundra, Arctic National Wildlife Refuge, Alaska](#)
- 72: [A New Approach to Liquefaction Potential Mapping Using Remote Sensing and Machine Learning](#)
- 73: [Modeling Spatial Recharge in the Arid Southern Okanagan Basin and Impacts of Future Predicted Climate Change](#)
- 74: [Application of MODIS Normalized Differential Vegetation Index for Local Land Use Indicators of Impervious Surface Areas](#)
- 75: [Pan-Tropical Forest Clearing, 2000-2005](#)
- 76: [Regional Climate Modeling over the Marmara Region, Turkey, with Improved Land Cover Data](#)
- 77: [The use of remote sensing for landslide hazard management in the aftermath of the Kashmir earthquake](#)
- 78: [Impact of Selective Logging on Phenology in Amazon Rain-Forests](#)
- 79: [Glacial Change in the Wind River Range, Wyoming, USA](#)
- 80: [Reuse of the NASA LP DAAC MODIS Reprojection Tool \(MRT\) and the USGS Global Visualization Viewer \(GloVis\) for the Development of the LP DAAC Web-Based MODIS Reprojection Tool \(MRTWeb\)](#)
