

2008 Fall Meeting Search Results

Cite abstracts as **Author(s) (2008), Title, Eos Trans. AGU, 89(53), Fall Meet. Suppl., Abstract xxxxx-xx**

Your query was:
landsat

The selected databases contain **93** documents matching your query:

Select some of the following documents:

Select/Deselect All

- 1: [The Landsat Legacy in Understanding a Changing Earth Posters](#)
- 2: [Opportunities and Challenges for Extending and Applying the Global Landsat Record](#)
- 3: [Per pixel processing of time-series Landsat data for mapping humid tropical forest cover and change](#)
- 4: [Next Generation Landsat Products Delivered Using Virtual Globes and OGC Standard Services](#)
- 5: [Web-enabled Landsat Data \(WELD\): a Consistent Seamless Near Real Time MODIS-Landsat Data Fusion for the Terrestrial User Community](#)
- 6: [Modeling Pine Plantation NEP Using Landsat](#)
- 7: [Fusion of Landsat with MODIS imagery to produce vegetation and change information with Landsat spatial and MODIS temporal characteristics](#)
- 8: [TimeSync: Synching Human and Automated Interpretations of Landsat Time-Series to Support a New Paradigm in Land Cover Change Detection](#)
- 9: [A 35-year range of variability in Alaska boreal forest burn severity derived from Landsat](#)
- 10: [The Landsat Image Mosaic of Antarctica](#)
- 11: [Alternative Approaches for Coarse Resolution Shrub Density Mapping in Arctic Tundra: Comparing Landsat Multi-spectral, MISR Multi-spectral/multi-angular and MODIS Multi-temporal Mapping Approaches](#)
- 12: [Carbon and CO Emissions From the 2004 Alaskan Fires](#)
- 13: [Glacier Retreat in the Cordillera Quimza Cruz \(Tres Cruces\), Bolivia from 1975 to present](#)
- 14: [Thermal Calibration of Landsat 5 TM From 1985 to the Present](#)
- 15: [Evaluating Spatio-Temporal Characteristics of Supra-Glacial Lakes in Western Greenland during the 2007 Melt Season using SPOT and LANDSAT Data](#)
- 16: [Estimating percent surface-water area using intermediate resolution satellite imagery](#)
- 17: [Dependence of Remote Sensing Evapotranspiration Algorithm on Spatial Resolution](#)
- 18: [Analysis of Forest Fire Disturbance in the Western United States Using Landsat Time Series Images: 1985 to 2005](#)
- 19: [Monitoring large area forest cover change using multi-resolution satellite data sets](#)
- 20: [Synergistic use of MODIS and Landsat data for mapping global carbon fluxes at 30m](#)
- 21: [Analysis of the spatial and temporal characteristics of the 2004 Alaskan fires](#)
- 22: [Analyzing the Impacts of Forest Cover Changes on Watershed Hydrology](#)
- 23: [Implementation of the North American Forest Dynamics \(NAFD\) Project: Current Progress and Future Plans](#)
- 24: [How does forest disturbance impact albedo as revealed from historical Landsat and MODIS data?](#)
- 25: [Estimation Of Leaf Area Index From Landsat Imagery For Texas High Plains Using Support Vector Machines](#)

- 26: [Carbon Budget and Land Use Change in Georgia](#)
- 27: [Delineation of a Re-establishing Drainage Network Using SPOT and Landsat Images](#)
- 28: [Validation of Fractional Snow Cover from AVHRR using Landsat TM](#)
- 29: [Retrieving LAI from Remotely Sensed Images: Spectral Indices vs. Spatial Texture](#)
- 30: [Towards a new High Resolution Orthophoto Mosaic Circa 1976 for the Northern Eurasia: Assessing the Potential of Declassified Hexagon KH-9 Images \(Tien Shan Region, Central Asia Case Study\)](#)
- 31: [Multi-Scale Validation of Forest Insect Mortality Using QuickBird and Aerial Imagery](#)
- 32: [Assessing the Impact of Data Resolution for Remote Sensing Based Models of Lava Flow Rheology](#)
- 33: [Vizcano: Student development of 3-D Volcanic Visualizations](#)
- 34: [Spatio-temporal dynamics of snow cover in the Western Tibetan Plateau using a MODIS derived fractional snow cover index.](#)
- 35: [North American Forest Dynamics Evaluated Using Landsat Observations and FIA Measurements: Science Goals within NACP](#)
- 36: [Evaluation of WRF-Urban Canopy Model over Seoul, Korea](#)
- 37: [Evaluation of NDWI as a Universal Index to Map Global Surface Water](#)
- 38: [An Approach for Developing Earth Science Data Records of Global Forest Cover Change](#)
- 39: [Synergistic Use of Space-borne LiDAR and Optical Imagery for Assessing Fire Disturbance across Alaska](#)
- 40: [Baseline uncertainties in wildfire emissions estimates using moderate resolution satellite imagery](#)
- 41: [QUANTIFICATION OF GLACIER CHANGES USING ICESAT ELEVATION DATA AND THE SRTM DIGITAL ELEVATION MODEL IN THE WESTERN KARAKORAM HIMALAYA REGION](#)
- 42: [An integrative approach to quantifying the effects of disturbance on regional forest carbon cycling](#)
- 43: [Groundwater Modeling of the Texas High Plains using Modflow](#)
- 44: [Groundwater Pathways In Fractured Heterogeneous Granitic Aquifers - A Hydrochemistry Survey In The Sassandra Watershed \(Inland Ivory Coast\)](#)
- 45: [Comparative Modeling of Floodplain Sedimentation with Static and Spatially Varying Friction: Feather River, California](#)
- 46: [SIMULATING THE SPATIAL, SPECTRAL, AND RADIOMETRIC RESPONSE OF SOME SATELLITE REMOTE SENSING INSTRUMENTS COMMONLY USED TO STUDY ACTIVE LAVAS](#)
- 47: [Thinking Along 2 Axes: Lakeshore Erosion and Subsurface Effects of Thaw Lakes Along Alaska's Arctic Coastal Plain](#)
- 48: [Utilizing remote sensing to supplement ground monitoring of *Diorhabda elongata* as a control agent for *Tamarix ramosissima* in Dinosaur National Monument](#)
- 49: [Using remote sensing data to estimate real-time crop water consumption](#)
- 50: [Cactus, Riparian Habitat, and Turf Grass: Water Budget and Policy Implications of Vegetation Change Under Urban Heat Island and Effluent Irrigation in the Southwest U.S.](#)
- 51: [Linking the Spatial Variability in Airborne Flux Measurements with the Spatial Heterogeneity in Surface Characteristics](#)
- 52: [Climatic and Tectonic Controls on ELA and Glacial Characteristics in the King Ata Tagh Range, Western China: Testing the Glacial Buzzsaw Hypothesis](#)
- 53: [Modeling the Response of Runoff in the Delaware River to Changes in Residential Development](#)
- 54: [FOREST WATCH: A K-12 OUTREACH PROGRAM TO ENGAGE YOUNG STUDENTS IN AUTHENTIC, HANDS-ON SCIENCE](#)

- 55: [Mapping Spatial Patterns of Woody Plant Cover Expansion in Chihuahuan Desert Grasslands, USA](#)
- 56: [Satellite-based Wetland Mapping in High Latitudes](#)
- 57: [Validation of Binary, Fractional and Interpolated Snow Maps at Multiple Resolutions](#)
- 58: [Evaluating ET estimates from the Simplified Surface Energy Balance \(SSEB\) model using METRIC model output](#)
- 59: [Remote Sensing of Desert Loess and Dune Fields Aids Revealing Proximal Loess Sources](#)
- 60: [Physics-based approach for the monitoring of Land Surface Phenology](#)
- 61: [Rapid Ice Loss on Kerguelen Islands \(Indian Ocean, 49S\)](#)
- 62: [Houston urban growth and associated aerosol effects on convection](#)
- 63: [Carbon consequences of forest disturbance and recovery across North America](#)
- 64: [Compare and Contrast Performance Anomalies in the Boreal Forests and Arctic Tundra of Alaska](#)
- 65: [Spatio-Temporal Analysis of Forest Edge Dynamics in South Western Amazonia](#)
- 66: [A Systematic Regional-scale Assessment of Lake Dynamics across the Tibetan Plateau](#)
- 67: [The relationship between remotely-sensed surface parameters and urban heat islands in the USA](#)
- 68: [Lava Flows, Rivers, and Lakes: Complex Interactions Along the McKenzie River, Central Oregon](#)
- 69: [Ecological Health and Water Quality Assessments in Big Creek Lake, AL](#)
- 70: [Mapping Deforestation In Parts Of The Amazon Forest Using JERS-1 SAR Images: Case Study For An Area North West Of Rondonia, Brazil](#)
- 71: [Use of Laboratory and Remote Sensing Techniques to Estimate Vegetation Patch Scale Emissions of Nitric Oxide From an Arid Kalahari Savanna](#)
- 72: [Land use driven vegetation processes and regional climate change](#)
- 73: [Multisensor and Multispectral Approach in Documenting and Analyzing Liquefaction Hazard using Remote Sensing](#)
- 74: [Burn Severity Assessment in the Okanogan-Wenatchee Forest Using NASA Satellite Missions](#)
- 75: [Land Cover Change Community-based Processing and Analysis System \(LC-ComPS\): Lessons Learned from Technology Infusion](#)
- 76: [Advancing the Remote Sensing of Land Surface-Atmosphere Interactions: Field Campaign Needs in the Next Decade](#)
- 77: [Afghanistan Glacier Diminution](#)
- 78: [Lineament Mapping for Groundwater Exploration Using Remotely Sensed Imagery in Different Terrains](#)
- 79: [Contemporary \(1951-2001\) Evolution of Lakes in the Old Crow Basin, Northern Yukon, Canada: Remote Sensing, Numerical Modeling, and Stable Isotope Analysis](#)
- 80: [Carbon Transformations Following Landscape Fire: Carbon Loss, Mortality, and Ecosystem Recovery Across the Metolius Watershed, Oregon](#)
- 81: [Incorporating maps of leaf chlorophyll in a thermal-based two-source energy balance scheme for mapping coupled fluxes of carbon and water exchange at a range of scales](#)
- 82: [Interannual Variability of Seasonally Influenced Playa Lake Inundation in Northern Mexico: Possible Analogs for Wetter Holocene Climates](#)
- 83: [The ORCA West Coast Regional Project - Atmospheric Top-Down Modeling to constrain Regional Carbon Budgets at high Temporal and Spatial Resolution](#)
- 84: [Gulf Coast Disaster Management: Forest Damage Detection and Carbon Flux Estimation](#)

- 85: [Carbon Cycling Studies in Forest and Rangeland Ecosystems of Northern and Central Coastal California](#)
- 86: [USGS Historical, Current, and Projected Future Land Cover Mapping for the Northern Great Plains](#)
- 87: [Trends in Land Surface Phenologies Across Central Asia and the Central Eurasian Grain Belt as Viewed From MODIS Collection 5 NBAR](#)
- 88: [Multi-scale Modeling of Energy Balance Fluxes in a Dense Tamarisk Riparian Forest](#)
- 89: [Hydrodynamics of the Groundwater-Fed Sian Ka'an Wetlands, Mexico, From InSAR and SAR Data](#)
- 90: [Advancing Glaciers and Positive Mass Anomaly in the Karakoram Himalaya, Pakistan](#)
- 91: [Partitioning Energy Balance in the Murrumbidgee Catchment, Australia: Examples from Airborne and Satellite Data](#)
- 92: [Is Central Asia really exsiccating?](#)
- 93: [Impact of land use change on actual crop water consumption using optical-thermal satellite data: A Case Study from Sanjiang Plain, China](#)
